Customer Reviews

i recently purchased the standard text book and state review exam in preparation for the california state board esthetician exam. i read the entire text book and whizzed through the review book. these materials are very basic and dated. the exam here in california is very medical and i was overwhelmed with the test's terminolgy and structure. needless to say i failed and now i have regrets that i even purchased these middle school texts. i suggest if you're preparing for your state

boards don't buy this crap and look for something more challenging and more informative. i suggest texts that specify in medical esthetics because this crap will barely get you out of esthetician school

I found this book to be a great help. I used it as a study guide with the text book and had no trouble with the test. I do agree with the reviewer above as to say there is a lot of medical terminology on the test and I had known that going in. This book helped me in a lot of other areas.

This book is a very helpful resource to those who are going to take their State Board Exam. I passed my first time and I studied like crazy from this book. It goes along with the text book very well, so if you have both the text book and this review book, you'll have what all the Schools in California are studying from.
